NISHA KUMARI

Chandigarh | P: +91 9835214992 | guptanisha702@gmail.com | www.linkedin.com/in/nisha-kumari22/

EDUCATION

Chandigarh University | Bachelor of Engineering in Information Technology — **Mohali, Punjab**
CGPA: 8.5/10 — 2022 - 2026

Gyan Bharti Public School | Intermediate (CBSE) — **Gaya, Bihar**
Percentage: 76% — 2021-2022

SKILLS

Languages: Python, C++, Java, JavaScript
AI/ML: Machine Learning, Deep Learning, NLP, Neural Networks, Model Evaluation, GenAI, LLMs, Prompt Engineering
Data Science: Pandas, NumPy, Data Analysis, Data Visualization
Databases: SQL, MySQL, MongoDB, NoSQL
Web & APIs: React.js, Express.js, Node.js, REST APIs
Cloud & DevOps: AWS (basics), Cloud Computing
Core Concepts: Data Structures & Algorithms, OOP, SDLC, Software Testing
Tools & Platforms: Git, GitHub, VS Code, Postman

PROJECTS

EARLY DISEASE DETECTION USING MACHINE LEARNING | Github

- Developed an **ML-based disease prediction system** using Python, Pandas, and Scikit-learn to analyze **5,000+ patient records** through data preprocessing and feature engineering.
- Implemented and compared **Naïve Bayes, Decision Tree, SVM, XGBoost, and Neural Network** models across diabetes, Parkinson's, and heart disease datasets.
- Improved model performance by **18%** using feature selection and **10-fold cross-validation**, evaluating models through Accuracy, Precision, Recall, and F1-score.

FACE MASK DETECTION USING DEEP LEARNING | *Python, TensorFlow, OpenCV, CNN*

- Developed a **CNN-based real-time face mask detection model** using TensorFlow and OpenCV, achieving **95% accuracy** on a dataset of 10,000+ images.
- Optimized the model for real-time video processing at **20+ FPS**, achieving **94% precision** for reliable mask detection.

AUTHENTICATION & USER MANAGEMENT SYSTEM (MERN + REST APIs) | Github

- Developed a secure authentication and user management system using **MongoDB, Express.js, React.js, and Node.js**, supporting **100+ users**.
- Built **3+ REST APIs** for login, signup, and account management with JWT-based authorization, input validation, and error handling.
- Improved API reliability by **20%** through backend debugging, API testing with **Postman**, and authentication workflow optimization

Internship - Infosys Springboard — MAY-JULY 2024

- Completed a **6-week Data Structures & Algorithms training program**, implementing 10+ algorithms across sorting, searching, linked lists, trees, and graphs with a focus on time and space complexity.
- Developed a **Contact Management System using Java and OOP**, implementing CRUD operations and managing **500+ records** efficiently.
- Improved data retrieval speed by **20%** through efficient data structures and algorithm optimization.

ACADEMIC ACHIEVEMENTS

- Awarded a **40% merit-based scholarship** from the first semester, maintained continuously throughout the program.
- Maintained **SGPA above 9.0** across multiple semesters and received **prize money** for excellence.

CERTIFICATIONS

- AWS Cloud Solutions Architect Professional - AWS
- AI Foundations for Everyone - IBM
- Generative AI for Program Managers - IBM, Skillup
- SQL: A Practical Introduction for Querying Databases- IBM
- NoSQL, Big Data, and Spark Foundations Specialization – IBM

EXTRA CURRICULAR & CO-CURRICULAR ACHIEVEMENTS

Student MOOC Coordinator at DLL (Department of Lifelong Learning):

- Guided **50+ students** in selecting **LinkedIn** and **Coursera** courses aligned with their academic and career goals, while boosting student enrollment and participation by **40%** through effective promotion and engagement initiatives.
